

Ghost hunting one-button game

I came up with a Halloween-themed ghost hunting one-button game. The basic idea was inspired by bubble shooter games.

How the One-Button Game Works:

1. **Ghost Presence:** Ghosts appear on the game screen.
2. **Sniper Shooting:** Players can “press the spacebar” to aim and shoot at the ghosts using a sniper scope.
3. **Scoring:** Every time a player successfully shoots a ghost, the game score increases by 1 point.
4. **Game Over:** If the player fails to shoot the ghost more than 3 times using the sniper scope, the game ends.

Basic ideas: bubble shooter games

Developed Idea: Ghost Hunting Game
